

- General** The cityBOX is an attractive and substantial product, that is suitable for all sorts of transportation. The quality is confirmed by the **3 years warranty**. An efficient large scale quantity production makes the cityBOX an interesting priced product with a consistently high quality. The cityBOX is sold in many European countries and is fully tested for durability by a well known European car company.
- Poly-Light** The cityBOX Poly-Light New Generation is the light weight polyester version of the cityBOX. A very high resistance flat wall structure is excellent for placing your advertisements and offers you a high net loading capacity.
- Walls & roof** Polyester panels of 4mm thickness have a special filler to obtain an extremely flat surface. The walls are reinforced with aluminium profiles. CTS01 Cream White or 9147 DB Artic White are the 2 standard colors. The outside is jointless.
Fully translucent polyester roofplate, slightly bent for good draining.
- Floor** Technical eminent underframe with durable coating - KTL and powdercoating.
15mm floorplate - with a hexa grip (one piece max. dimensions: 4.400 x 2.200 mm).
- Doors** Double-walled with stainless steel hinges and internal locks. Both doors can be opened over 270 degrees and locked against the side walls.
- Interior** Walls provided with wooden lattice and a 4 latch high kickboard.
Ceiling light with switch.
- Footboard** Anodised aluminium footboard with rubber profile at the rear side.
- Dimensions** Length Internal length + 90mm = external length
 Width Internal width 1920, 2110 or 2250mm + 100mm = external width
 Height Internal height - 35mm = loading height doors
- Various** Mudguards and mounting material included in the delivery.

Optional side protection bars, roof and side marker lamps
